## Today's Market Reports

### STIFFENING MONEY RATES SERVES TO CHECK SPECULATION

**By Leased Wire to Evening Herald.**—New York, May 19.—The market closed strong today. Initial firmness of the market was partly offset later by various unfavorable influences, including poor weather reports, pessimism in high business circles, and stiffening of money rates. Cheesemakers and Ohio recovered all of its losses and prices in the main showed fractional changes.

Closing prices on the more important stocks were:

- Amalgamated, 73 1/4-4.
- Sugar, 105 1/2.
- Atchison, 96 1/4-5.
- Roaded, 104 1/2.
- Southern Pacific, 92 7/8.
- Union Pacific, 155.
- Steel, 67 1/4.
- Steel, preferred, 110.

### Chicago Grain

Chicago, May 19.—Uneasiness over crop damage from Hessian fly carried the wheat market today sharply higher. It was conceded that the loss certainly amounted to many million bushels, and there seemed no telling what the final outcome would be. Pit offerings were light and buying orders the rule. Quotations, which started the same as last night to 3 1/2 higher, continued to rise without any material setback.

The close was strong, 4 1/2 to 14 1/2 per bushel.

Corn advanced with wheat. Fine weather and easier cables were ignored. Prices opened 1 1/2 off to 1 1/2 up and then made an advance all around. Firmness of other grain influenced oats so also did the fact that a Canadian cargo here had failed to reach contract grade.

The close was firm, 3 1/2 to 14 1/2.

### LAMBS UNDAMAGED BY MAIL STORM IN SAN MIGUEL COUNTY.

East Las Vegas, N. M., May 17.—The total fall of rain Sunday evening amounted to 1/2 inch, according to O. L. Hargrove, volunteer observer at the Normal University. The heaviest rain was in the mountains though an unusually heavy fall stormed in this vicinity and the nearby country.

Sheep men last night expressed fear that the half-inch result in the death of a large number of lambs, but reports were received this morning to the effect that practically all this year's lamb had survived the storm. It is expected however, that the fruit crop will be damaged somewhat as a result of the storm, as many of the buds were knocked from the trees. It is reported that only a small amount of damage occurred, and as some trail growers believe that a tree bearing a medium crop produces a better quality fruit than a tree that is overloaded, the storm may have done some good.
